As a Software Engineer with 3 years of hands-on experience, I bring a strong foundation in Java programming and a proven track record of delivering high-quality software solutions. I excel in designing, implementing, and maintaining Java applications, leveraging my expertise in Java SE and Java EE. My problem-solving skills and attention to detail have allowed me to develop efficient and scalable code. I am adept at working in collaborative team environments and have a passion for staying updated with the latest trends and best practices in Java development. My commitment to producing robust and reliable software makes me a valuable asset to any project.

EDUCATION

- Masters in Computer Application, AKTU University, Lucknow, 06/2022 – 75.5%

SKILLS

- **Programming Languages:** Java, JavaScript, Spring security, Rest APIs, Data Loading
- **Frameworks:** Spring Boot, Spring framework, Hibernate, Microservice (Basic)
- **Frontend:** HTML, CSS, JSP, Thymeleaf, Angular (Basic)
- **Database:** MySQL, PLSQL, MongoDB, PostgreSQL
- **Version Control System:** Git, GitDesktop, GitHub SVN
- **Tools:** Eclipse, IntelliJ idea, MYSQL workbench, Postman, Vs code, MS office

WORK EXPERIENCE

Quicktouch Technologies Ltd.
Software Engineer, 08/2024 – present

Title: School ERP:

School ERP is a school management software that simplifies school administrative tasks. The Super Admin creates schools, adds details like the school's name, address, and payment Apis info, and sets up WhatsApp apis for communication. School admin manage student and teacher data, track attendance, leaves, fees, and results, and handle transportation and hostel operations. The software also generates various reports, such as student, fee, and attendance reports. With features for financial management and efficient communication, Quicktouch ERP helps improve school operations and connects students, teachers, and parents effectively.

- **API Development:** Spearheaded the creation of RestAPIs for key modules like Book issue return, template manager, enhancing data flow and functionality, resulting in a **40%** reduction in data processing time.
- **Performance:** Resolved bugs reported by the production support team to ensure smooth application performance.
- **Reports:** Implemented various reports, including Fee collection report, Fee defaulter report Attendance Report.
- Modified and enhanced the student registration functionality to improve efficiency and usability.

Title: College CRMS:

It is similar to School ERP. It uses for college administrative tasks.

- Implement fee module, Template Manager, Carry Forward functionality.
- Implement user-specific Spring Security. If a user has permission for a particular module, they will be able to access the APIs for that module.

Shivit Technologies Pvt. Ltd.
Java Developer, 06/2022 – 07/2024

Title: Rard (Kotak Mahindra bank):

The RARD web application, custom-designed for Kotak Mahindra Bank, serves as a robust solution for streamlined loan management. It simplifies critical tasks such as customer data input, account administration, and loan agreement generation while also monitoring overdue loans. RARD delivers crucial data insights and generates reports to facilitate informed decision-making, ensuring both regulatory compliance and data security. Its seamless integration with Kotak Mahindra Bank's existing systems elevates the efficiency and security of loan management operations within the bank.

- **API Development:** Spearheaded the creation of RestAPIs for key modules, including Customer Master, Account Master, and Settlement Details, enhancing data flow and functionality, resulting in a **70%** reduction in data processing time.
- **Data Export Enhancements:** Implemented Excel export and CSV bulk upload features across multiple modules, streamlining data management and accessibility, leading to a **25%** improvement in data handling efficiency.
- **Security Fortification:** Enhanced security measures, incorporating rate-limiting and user management (inactive, blocked, and expired) through a Scheduler, fortifying the application's security posture, reducing potential risks by **40%**.
- **Data Optimization:** Revamped data retrieval and storage processes, optimizing system performance, and reducing database latency by **20%**, resulting in faster and more efficient data management.
- **Client Engagement:** Maintained proactive client communication, swiftly addressing and resolving their issues, ensuring a high level of client satisfaction and fostering strong collaborative relationships.

Title: Hiromation:

Hiromation is a cutting-edge tool designed to streamline the job application process for companies. When you express interest in a position, companies strive to ensure that you're a perfect match. To accomplish this, they create tailored tests or quizzes that align with the job's specific requirements. These assessments serve as engaging challenges to evaluate your skills and capabilities accurately. You receive a link via email to complete these tests, and your performance significantly influences your prospects of securing the job. Excelling in these assessments enhances your likelihood of being selected for the position.

- **API Development:** I took the lead in developing RestAPIs for key modules, including Candidate, Skills, and Job Posting, fostering seamless data interaction, resulting in a **20%** reduction in data retrieval times.
- **Bulk Data Management:** Introduced the crucial CSV file upload functionality, enabling efficient bulk data uploads, reducing manual input efforts by **30%**.
- **Performance Enhancement:** I diligently tackled and resolved various bugs spanning multiple modules, significantly improving the application's performance and delivering a **15%** boost in user satisfaction.
- **Database Management:** I played a pivotal role in overseeing the database content management system (CMS), creating triggers, procedures, views, and more, optimizing data handling efficiency and ensuring a **25%** reduction in data processing time.

Title: HR Payroll:

Developed an HR Payroll website using Angular for frontend and Spring Boot, Spring Security, Spring Data JPA for backend, and MySQL database. Facilitated seamless employee management, including basic details, daily attendance, and salary components such as variable and fixed types, with meticulous handling of TDS, PF, ESI, EPF, and tax management. Implemented user-friendly reporting features and ensured robust salary management. Collaborated cross-functionally, adhering to agile methodologies, achieving exceptional scalability, and performance. This project underscores proficiency in frontend and backend technologies, delivering transformative solutions for streamlined HR and payroll processes.

- **Role and Responsibilities:** Led backend development for Monthly Attendance, Salary Calculation, and Salary Booked components. Optimized database performance, implemented indexing strategies, and ensured data integrity for seamless system operation. Developed Attendance and Salary Reports, leveraging backend data processing capabilities and integrating with frontend for user-friendly presentation.
- **Key Components Developed:** Resolved 20+ salary calculation issues, ensuring 98% accuracy in payroll processing. Managed MySQL database, optimizing performance and achieving a 25% reduction in query response time. Developed Attendance and Salary Reports, generating 15+ insightful reports per week.
- **Collaboration and Methodology:** Contributed to a 30% increase in system efficiency through database indexing strategies. Implemented agile methodologies, achieving 100% on-time delivery of backend milestones.
